Art Unit: 1771

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the argument set forth in the Appeal Brief that WO 93/08322 does not teach the step of arranging a plurality of parallel filament to form a unidirectionally oriented fibrous and placing matrix islands within the plurality of filaments is persuasive. WO '322 teaches that rovings may be used in making a mat to which the matrix particles can be applied, but does not teach applying the matrix islands to the rovings per se. For example, at page 5, line 34, WO '322 teaches that rovings are useful in making the mat to which the matrix islands are applied, but WO '322 also teaches that the term "mat" refers to a collection of intersecting fibers to which a binder has been applied, (see page 4, lines 3-5). Example 2 of WO '322 teaches applying the matrix particles to a roving, but only after the roving has been formed into a woven mat. Therefore, WO '322 does not teach the step of applying the matrix islands to the plurality of filament which have been arranged as parallel filament to form a unidirectionally oriented fibrous web.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
